My memories of being raised in the 1940's and early 1950's are those of a child. It was simple and free. Not a complicated time.

In a way, that was probably true. However with age comes an understanding that much below the surface was unseen. Today instant information from both traditional and uncensored sources makes me aware of almost too many things.

Here's a sentimental tribute to the innocence of the time.

This 6-minute video is a 63MB flash file. It will take a moment to begin playing depending on your connection speed.

To see the high-resolution or full-screen version requires a plugin called Photodex Presenter (pxplay). You may need to select "Manual Install".

```
PresenterObject("ProShow", "objectname", "/webshow/CloseYourEyesBaby.px", 640, 480, true);
```

You can play full screen with right mouse-click. Very cool. All popular browsers are supported, but you need to be using a Windows computer.

This 6-minute video is a 68MB file. It will take a moment to begin playing depending on your connection speed.
